Subject: [3128] FS: HP 50MHz frequency counter
Message-ID: <9509091632.AA23419@hpbs3929.boi.hp.com>

Hello,

Sorry if this is out of place, but I thought there might be a home-brewer on the list who might like to make use of this. I received it as partial trade for an H-T, and I already have a counter.

For Sale -- Hewlett-Packard 5302A Universal Counter
Hewlett-Packard 5300A Measuring System (mainframe)

This unit "is capable of: Measuring frequencies up to 50 MHz, Time Interval measurements from 500 nsecs to 1000 seconds, Period and Period Average over a range of 10 Hz to 1 MHz, Ratio of two Frequencies and Totalizing." It is in very good shape (some wearing of paint on the front top edge, and marks left by long-term masking tape on the top of the unit. Also, the white lettering on the red plastic display bezel have faded.), and when tested against the output of a friend's 'Heatkit Most Accurate Clock', the counter registers within 1 Hz of correct.

Included is the Operating and Service Manual for the counter (sorry, none for the mainframe), and AC power cord (standard computer type). The unit measures 6"wide x 4"high x 10"deep, certainly not a hand-held unit.

I would like $60 for the unit, but would be willing to trade for a low power TNC, or ???. I'd be happy to answer any questions.

Subject: [3132] Oct QRP Quarterly index
Message-ID: <1995Sep09.182118.6168@abs.net>

For those who are members of the QRP Amateur Radio Club International, and thus subscribers to the QRP Quarterly, here's advance word on the contents of the October issue. Note the page numbers on some of these items--this will be the biggest issue ever! (And perhaps never to repeated, something that will have to be decided when the bills roll in from this huge issue :-) And even if we can afford it, we still need inputs from the readers--and that's you!)

This info was recently posted to the staff by new editor Monte Stark, KU7Y of QRP-L fame. Although the July issue was good, and set a record for size, he didn't have much to do with it except print an announcement of his arrival. We have outgoing editor or publisher or whatever you want to call her, Paula Franke, WB9TBU to thank for that one. Monte takes over the reins with the October issue, which is, at this very moment, sitting at the printer waiting for the presses to roll on Monday, 11 Sept (September!).

Be sure to check your mailing label from time to time to make sure you haven't expired yet. The mailing labels should be at the printer very shortly, so it's probably too late to make it if you aren't a subscriber or had your subscription expire. However, after everything is mailed out the remaining copies are sent to Mike Bryce, WB8VGE, who is the membership chairman, so if you subscribe or renew late you can probably get him to start your sub with the October issue. (Although not on QRP-L or Internet, he does have an e-mail address: 73357.222@compuserve.com.)

Subject: [3129] Oct QRP Quarterly on track
Message-ID: <1995Sep09.122053.6718@abs.net>

Pardon me if this has already been posted; I get the daily digest only, and am a couple days behind on reading it, so someone may have put this info out already. KU7Y, new editor of the QRP Quarterly, just told us (the staff) that the Oct issue is in the hands of the printer, the full press run will be started on Monday, 11 Sept (September!) and goes to the mailer on the 15th (of September!) so you can expect an on-time October issue. And for those poor souls who don't get it, or may not even know what it is--and there are lots in both categories here on QRP-L--the QRP Quarterly is the journal of the QRP Amateur Radio Club International, arguably the oldest QRP journal in existance. (Technically speaking, it didn't turn into a "real" QRP club until circa 1979, due to the efforts of then-President K8IF, Tom Davis, so technically speaking the GQRP Clubs SPRAT is older, at least as a "real" QRP journal. In fact, the Oct issue contains a reprint of a

W0RSP QRP column in CQ from years ago which explains exactly what K8IF did to turn the QRP ARCI into a low-power QRP club.)

Anyone interested in info on the QRP ARCI and QRP Q can write to WB8VGE, Mike Bryce, good in the callbook for many years. Include SASE for info, or $2 for info plus a sample copy of the QRP Quarterly. (Yes, it would be cheaper to send $2 every quarter for a sample issue, and you'd pay $8 per year for it instead of the $12 for membership and then $10 per year for renewal. Unfortunately, though, Mike is a smart guy and doesn't fall for that trick :-)) And if anyone would like a copy of the e-mail info file I have on disk about joining the QRP ARCI, let me know by e-mail and I'll zip a copy back to you. 73 and Queue

Subject: [3131] QRN - 2.5w Any hope?
Message-ID: <09SEP95.19577156.0012.MUSIC@MARISTB.MARIST.EDU>

Hi Gang,
What is a 'reasonable expectation' for getting through the QRN with 2.5 watts. All my contacts have been made before 7 pm. EDT. Is there are message here? Don't try after 7 while there is still static? When do th e condition change? (I feel like I am leading with my chin) When do t he 'better' months come?
Remember any advice will be gladly accepted.
Fr Bowes

Subject: [3127] QRP-L: Unsubscribing problems
Message-ID: <199509090413.AAA13987@deathstar.cris.com>

To whom it may concern,
As I was getting too much mail from this list and didn't have time to keep up with it I unsubscribed to it for now. But, I'm still getting mail from the list. I've sent the unsubscribe message two times, the last one said I was not a subscriber so it worked the first time. Can someone help me with this? Thanks in advance and for

the bandwith.

Subject: [3130] Scout- RF Power Front Panel Mod.
Message-ID: <950909153245_95262412@mail02.mail.aol.com>

Last call ! I have 3 addresses to send this mod to. The mod is for Ten Tec Scout radios to be able to adjust output power from 3 to 50 watts from the Microphone Control knob on the front panel without having to make the screwdriver adjustment on the bottom of the radio. The microphone level becomes a fixed value. This is the way the Scout should have been made for the QRPer who sometimes needs to run the full 50 watts. And, the Scout will still perform as good on SSB with a microphone.

Send E-mail to me and I'll send you the mod before it is published FREE.
  I'll only do this for 8 more QRPers owning Scouts.
